Handprint Mermaid

Step 2. Now create a face for the mermaid. To do this, paint a circle shape in a chosen colour directly under the handprint. Also, paint some arms just below the face on either side.

Step 3. To print the mermaid's body, paint a hand and print it onto the paper upside down. Make sure you keep the fingers together.

Step 4. To create the fins on the bottom of the mermaid's body, paint your hand but not the thumb. Then print this coming off the bottom of the body in two different directions.

Step 5. Add scales by dipping the tip of a finger in paint, then printing onto the mermaid's body.

Step 6. Now use a paintbrush to paint your mermaid some fishy friends! You could also make some bubbles by printing with old bottle tops. Leave to dry.
